## Perioperative Nursing in Pediatric Surgery

15 credits, Part-time studies, October 2022 - May 2023

*This course gives nurses in-depth knowledge in the specific problem areas that arise when children undergo surgical procedures.*

### About the course

This is a training for specialist nurses involved in the surgical care of children.

The overall aim of the course is to give:

- In-depth knowledge and expertise within perioperative nursing and care in pediatric surgery.
- In-depth understanding and insights into the difference when it comes to children and adults in the context of surgery.

### Content

The course is divided into two parts:

- Theory in Pediatric Surgical Care 7.5 credits
- Clinical Education in Pediatric Surgery 7.5 credits

### Course set-up

The teaching is based on a problem-oriented and collaborative approach to learning. You will be provided with conditions for you to actively take responsibility for your learning.

The training consists of lectures and various interactive teaching and working methods such as individual work, group work and seminars.

The course is delivered as part-time studies, with seminars and lectures on five occasions at Karolinska University Hospital in Stockholm. A web-based learning platform will also be used for certain parts of the course.

### Target audience

The course is aimed for registered nurses involved in the surgical care of children.
